Chapter 11: Future Scope

The Garage Management System (GMS) built on Salesforce is more than just a digital toolkit—it's a launchpad for innovation in automotive service. As technology and customer expectations evolve, here's how the system can grow and adapt:

1. IoT & Smart Vehicle Integration

- Connect with vehicle sensors or OBD devices to auto-log diagnostics.
- Enable predictive maintenance alerts based on real-time data.

2. Mobile App Expansion

- Customer-facing apps for booking, tracking, and payments.
- Technician apps for managing job cards, inventory, and service logs on the go.

3. AI & Einstein Automation

- Use Salesforce Einstein to recommend services based on history and usage.
- Automate follow-ups, upselling, and appointment scheduling with AI-driven flows.

4. Multi-Branch & Franchise Support

- Centralized dashboards for multiple garage locations.
- Role-based access for regional managers, technicians, and support staff.

5. Payment Gateway & Loyalty Programs

- Integrate with platforms like Razorpay or Stripe for seamless billing.
- Launch loyalty rewards, service subscriptions, and EMI options.

6. Advanced Analytics & Forecasting

- Predict inventory needs, peak service hours, and revenue trends.
- Benchmark technician performance and customer satisfaction across branches.

7. Third-Party API Integration

- Connect with insurance providers, spare part suppliers, and vehicle OEMs.

GARAGE MANAGEMENT SYSTEM

- Enable automated claims, warranty checks, and parts ordering.

8. Sustainability & ESG Tracking

- Monitor carbon footprint of services and promote eco-friendly practices.
- Integrate with Salesforce Net Zero Cloud for environmental impact reporting.
