Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud.

So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:

<https://youtu.be/r9EX3lGde5k>

GARAGEMANAGEMENTSYSTEM

MILESTONE-1

Salesforce

ACTIVITY-1:-CreatingDeveloperAccount:

Creating a developer org in salesforce.

1. Goto <https://developer.salesforce.com/signup>
2. Onthesign-upform,enterthefollowing details:

- **FIRSTNAME:**pamala
- **LASTNAME:**ganesh kumar
- **JOBTITLE:**Developer
- **WORKEmail:** ganeshpamala586@gmail.com
- **COMPANY:**GayatriDegreeCollege Tirupati
- **COUNTRY/REGION:**India

Activity 2:AccountActivation: Account

Activation:

1. Gototheinboxoftheemailthatyouusedwhilesigningup.Clickontheverify account to activate your account. The email may take 5-10mins.

2. ClickonVerifyAccount
3. Giveapasswordandanswerasecurityquestionandclickonchange

password.

4. Then you will redirect to your salesforce setup page.

MILESTONE-2

OBJECT

ACTIVITY-1:CreateCustomerDetailsObject To

create an object:

1. Fromthesetuppage>>ClickonObjectManager>>ClickonCreate>>Click on Custom Object.

2. Enterthelabelname>>CustomerDetails
3. Plurallabelname>>CustomerDetails

4. EnterRecordNameLabelandFormat
 5. RecordName>>CustomerName
 6. DataType>>Text
- ClickonAllowreportsandTrackFieldHistory.

GARAGEMANAGEMENTSYSTEM

The screenshot shows the Salesforce Setup interface for creating a new custom object. The browser tabs include Smartinternz, Inbox (141), yuvasreenetham7, Home | Salesforce, and New Custom Object | Salesforce. The URL is orgfarm-4fa143518c-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/new. The page title is "New Custom Object".

Record Name: Customer Details Name **Example:** Account Name

Data Type: Text **Warning:** If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

- ☒ Allow Reports
- ☐ Allow Activities
- ☒ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Deployment Status [What is this?](#)

7. Allowsearch>> Save.

4. ClickonAllowreportsandTrackField History,

GARAGEMANAGEMENTSYSTEM

The screenshot shows the Salesforce Setup interface for the 'Billing details and feedback' object. The left sidebar contains a navigation menu with options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, and Related Lookup Filters. The main content area is titled 'Enter Record Name Label and Format' and includes a warning about high-volume API insertions. It features input fields for 'Record Name' (set to 'Billing details and feedback'), 'Data Type' (set to 'Auto Number'), and 'Display Format' (set to 'bill-{:000}'). Below this, the 'Optional Features' section has checkboxes for 'Allow Reports', 'Allow Activities', 'Track Field History', 'Allow in Chatter Groups', and 'Enable Licensing'. The 'Object Classification' section explains that enabling these settings classifies the object as an Enterprise Application object, while disabling them classifies it as a Light Application object.

5. Allowsearch >> Save.

This screenshot shows the 'Search Status' section of the configuration page. It includes a checkbox for 'Allow Search' which is currently checked. Below this, there are buttons for 'Save', 'Save & New', and 'Cancel'. The 'Object Classification' section is also visible, showing that the object is classified as an Enterprise Application object.

This screenshot shows the 'Details' section of the configuration page. It includes a 'Description' field, an 'API Name' field (set to 'Billing_details_and_feedback__c'), and a 'Custom' checkbox. The 'Singular Label' is 'Billing details and feedback' and the 'Plural Label' is 'Billing details and feedback'. The 'Details' section also includes a 'Related Lookup Filters' section. The 'Optional Features' section is visible on the right, showing checkboxes for 'Allow Reports', 'Track Activities', 'Track Field History', 'Deployment Status', 'Help Settings', and 'Standard salesforce.com Help Window'.

MILESTONE-3

TABS

ACTIVITY-1:-Creating a Custom Tab

To create a Tab: (Customer Details)

- Go to setup page > > type Tabs in Quick Find bar > > click on tabs > > New (under custom object tab)

- Select Object (Customer Details) > > Select the tab style > > Next (Add to profile page) keep it as default > > Next (Add to Custom App) uncheck the include

New Custom Object Tab Help for this Page

Step 1. Enter the Details Step 1 of 3

Choose the custom object for this new custom tab. Fill in other details.

Select an existing custom object or create a new custom object now.

Object:

Tab Style:

(Optional) Choose a Home Page Custom Link to show as a splash page the first time your users click on this tab.

Splash Page Custom Link:

Enter a short description.

Description:

- Make sure that the Append tab to users' existing personal customizations is checked.
- Click save.

GARAGEMANAGEMENTSYSTEM

Step 3. Add to Custom Apps Step 3 of 3

Choose the custom apps for which the new custom tab will be available. You may also examine or alter the visibility of tabs from the detail and edit pages of each Custom App.

Custom App	 ☐ Include Tab
Platform (standard__Platform)	☐

Field Label	Field Name	Data Type	Controlling Field	Indexed
Appointment Date	Appointment_Date__c	Date		
Appointment Name	Name	Auto Number		✓

- Select "Look-up relationship" as data type and click Next.

Specify the type of information that the custom field will contain.

Data Type

☐ None Selected Select one of the data types below

☐ Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

☐ Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

☐ Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

☒ Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

☐ Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The master key and choice of a detail record are determined by the master record.

next cancel

- Select the related object "CustomerDetails" and click next.
- Next > Next > Save

GARAGEMANAGEMENTSYSTEM

➤ Creation of Lookup Field on Service records Object:

- Go to setup > click on Object Manager > type object name (Service records) in search bar > click on the object.

- Now click on "Fields & Relationships" > New

- Description: (empty)
- Help Text: (empty)

A yellow tooltip is visible next to the Field Name field, stating: "The Field Name is an internal reference and is used for integration purposes such as custom links, custom s-controls, and the API. Be careful when changing the Field Name as it may affect existing integrations." The bottom of the screen shows the Windows taskbar with the search bar and various application icons.

- Clickonnext> >next> > save

ACTIVITY – 7 :- Creation of Picklist Fields

Creation of Picklist Fields in Service records object:

- Goto setup > > click on Object Manager > > type object name (Service records) in search bar > > click on the object.
- Click on fields & relationship > > click on New.
- Select Data type as "Picklist" and click Next.
- Enter Field Label as "Service Status", under values select "Enter values, with each value separated by a new line" and enter values as shown below.
- The values are: Started, Completed.

The screenshot shows the 'New Custom Field' window at Step 2 of 4. The 'Field Label' is 'Service Status'. Under the 'Values' section, the option 'Enter values, with each value separated by a new line' is selected. The text area below contains 'Started' and 'Completed' on separate lines. Other options include 'Use global picklist value set', 'Display values alphabetically, not in the order entered', 'Use first value as default value', and 'Restrict picklist to the values defined in the value set'. The 'Field Name' is 'Service_Status'.

- Click Next.
- Next > > Next > > Save.

Creation of Picklist Fields in Billing details and feedback object:

- Goto setup > > click on Object Manager > > type object name (Billing details and feedback) in search bar > > click on the object.
- Click on fields & relationship > > click on New.
- Select Data type as "Picklist" and click Next.
- Enter Field Label as "Payment Status", under values select "Enter values, with each value separated by a new line" and enter values as shown below.
- The values are: Pending, Completed.

- ClickNext.
- Next>>Next >>Save.

ACTIVITY-8:-CreatingFormulaFieldinServicerecordsObject

- Gotosetup>>clickonObjectManager>>typeobjectname(Service records) in search bar>>click on the object.
- Clickonfields&relationship>>clickonNew.
- SelectDatatypeas"Formula"andclick Next.
- GiveFieldLabelandFieldNameas"servicedate"andselectformulareturn type as "Date" and click next.

Step 2. Choose output type

Field Label: service date

Field Name: service_date

Auto add to custom report type: ☒ Add this field to existing custom report types that contain this entity

Formula Return Type

☐ None Selected

☐ Checkbox

☐ Currency

☒ Date

☐ DateTime

Select one of the data types below:

Calculate a boolean value
Example: `TODAY() > CloseDate`

Calculate a dollar or other currency amount and automatically format the field as a currency amount.
Example: `Gross Margin = Amount - Cost_c`

Calculate a date, for example, by adding or subtracting days to other dates.
Example: `Reminder Date = CloseDate - 7`

Calculate a datetime, for example, by adding a number of hours or days to another datetime.
Example: `Next = NOW() + 1`

Previous Next Cancel

- Step 4: Select the users to share with**: Share with is 'Roles', Manager is 'Manager'.
- Step 5: Select the level of access for the users**: Access Level is 'Read/Write'.
- The 'Save' button is highlighted.

Milestone-13 Fields

ACTIVITY-1:-Createa Flow

- Gotosetup>>type Flowinquickfindbox>>ClickontheFlowandSelect the New Flow.

- SelecttheRecord-triggeredflowandClickonCreate.

- SelecttheObjectas"Billingdetailsandfeedback"inthedropdown list.
- SelecttheTriggerFlow when:"Arecord isCreatedor Updated".

SelecttheOptimizetheflowfor:"ActionsandRelatedRecords"andClickonDone.

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements

None

*** Optimize the Flow for:**

Fast Field Updates

Update fields on the record that triggers the flow to run. This high-performance flow runs *before* the record is saved to the database.

Actions and Related Records

Update any record and perform actions, like send an email. This more flexible flow runs *after* the record is saved to the database.

☐ Include a Run Asynchronously path to access an external system after the original transaction for the triggering record is successfully committed

Cancel Done

- Under the Record-triggered Flow Click on "Symbol and In the Dropdown List select the "Update records Element".

User Adoption

ACTIVITY-1:creating records

To create a record in the following objects, follow these steps

- Click on the app launcher located at the left side of the screen.
- Search for "GarageManagement" and click on it.
- Click on the "Consumer detailstab".
- Click on new and fill the details as shown below figs, and click save.

New Customer Detail

* = Required Information

Information

* Customer Name

Phone number

Gmail

Owner
Annapurna SmartBridge

Cancel Save & New Save

Now, Create the Appointment Record

- Click on the "**Appointment**" tab".
- Enter the customer details as created, while entering Appointment Date enter the date less than the created date.
- Match the validation while entering the vehicle number plate.
- Select the services you need.
- Click on save to see the Service Amount.

The screenshot shows the 'Appointment' form in the Garage Management System. The form is titled 'Appointment app-016'. It includes fields for 'Customer Details' (Mac), 'Appointment Date' (13/11/2024), 'Maintenance service' (checked), 'Repairs' (checked), 'Replacement Parts' (unchecked), 'Service Amount' (empty), and 'Vehicle number plate' (TS30EU0443). The 'Owner' is listed as 'Annapurna SmartBridge'. At the bottom, there are 'Cancel' and 'Save' buttons, and a timestamp 'Created By Annapurna SmartBridge, 18/11/2024, 3:28 pm'.

Now, Create a service record

- Click on the "Service record tab".
- Enter the Appointment, and started is selected as default.
- Click on save.

The screenshot shows the 'New Service record' form. It includes fields for 'Service Record Name', 'Appointment' (app-016), 'Quality Check Status' (unchecked), and 'Service Status' (Started). The 'Owner' is listed as 'Annapurna SmartBridge'. At the bottom, there are 'Cancel', 'Save & New', and 'Save' buttons. A legend indicates that '*' = Required Information.

- Open the record and click on Quality check status as true.
- Click on save.
